CDS9 Changes the Way You Look at Cash

CDS9 is the premium self-service partner for complete automation of coin deposit and note recycling. You get a secure and reliable solution with the latest technology in a modern design, combined with a mature software with optimised features. Stay on-line with full connectivity and increase the efficiency and productivity of your business.

Security in focus

The cash is securely stored in the safes which are available both as front and rear access. The machine follows the requirements stated by both ETSC and ECB framework for the EUR-zone and the latest anti manipulation technology comes with the card reader. The machines are equipped with awareness mirrors for preventing shoulder surfing and are prepared for any type of surveillance and portrait cameras, all to make usage safe and pleasant.

Designed for best customer experience

With the latest machine design the CDS9 comes with two clear and reliable 15" touch screens with tablet-feeling. One for the user and one on the rear side for the operator. The interaction between the user and the machine is carefully thought through with clear illuminated indicators. The overall design is well suited for best accessibility for people with disabilities.

Highest reliability and uptime

The CDS9 is built around the best coin and note technology available on the market, offering you a premium product. User interface and technology have been carefully developed, tested and verified to give trouble free operations with the absolute highest reliability and maximum uptime.

Superior Financial and Operational Control

The CDS works seamlessly with the unique monitoring software solution, SoftOne Intelligence. The solution is the ultimate management platform for superior financial and operational control of cash. It brings the very most out of your new CDS. The cash solution is also connectable to any existing network and can be monitored from any remote position. Maximize the value of your business and benefit from best-in-class cash handling technology and system.

- ► ERP integration
- ► CIT integration
- ► Report generation
- ► Financial control
- ► Monitoring for maximum uptime
- ► Automated reconciliations
